

## **MILESTONE SCIENTIFIC EXPANDS *STA*<sup>™</sup> SALES SUPPORT TEAM WITH CLINICAL PRODUCT SPECIALISTS**

**LIVINGSTON, N.J. – (PR NEWSWIRE) – November 14, 2008** – Milestone Scientific Inc. (OTCBB:MLSS), the recognized leader in advanced injection technologies, today announced the addition of two Registered Dental Hygienists, Jennifer Duffy, RDH and Renee Cultrara, RDH to the Company’s Sales Support team, reporting directly to Robert Presutti, Milestone’s Vice President of Sales and Marketing. Duffy and Cultrara have been hired to serve as Clinical Product Specialists who will collaborate with field sales representatives from the Company’s growing global independent distributor network to demonstrate and instruct dental professionals on the ease of use, advanced functionality and proper administration of the *STA*<sup>™</sup> System.

The patented, award-winning *STA System* utilizes Computer-Controlled Local Anesthesia Delivery (C-CLAD) to enhance the injection process for both the dentist and the patient. Real time audio and visual confirmations make injections, like the Periodontal Intraligamentary (PDL), more accurate and less stressful. According to Dr. Tom Gallivan, Jr., DDS, “I’ve been using it in my practice for eight months and I could never go back to giving conventional blocks again. It is one of those disruptive technologies, like digital radiography, that are so much better than their predecessors. Let’s put it this way – if I need a local anesthetic for treatment, I’ll search out a *STA* dentist!”

“We have come to learn that once dental practitioners understand *how* to administer injections using the *STA System*, their reluctance to embrace this groundbreaking science-based technology as part of their daily practice of Dentistry quickly diminishes,” stated Scott Mahnken, Director of Marketing. “Having Jennifer and Renee available to travel with sales reps to demonstrate the *STA* to sales prospects, or to assist new customers on gaining rapid efficiency with the *STA*, should help drive greater sales of the instrument and further enhance the high level of service and attention that our customers have come to expect from Milestone.”

Over the past 19 years, Duffy worked first as a professional Dental Assistant and later as a Dental Hygienist for several leading dentistry practices in New Jersey. In addition to her full-time product training responsibilities at Milestone, she also works part-time for a general dentistry practice in Hamilton Square, New Jersey, where she focuses on enhancing her advanced clinical skill set and on maintaining optimal awareness of the real-world needs and demands of today’s modern dentistry practice. After completing undergraduate studies at Old Dominion University, Duffy received an AAS degree in Dental Hygiene from Middlesex College.

Before joining Milestone, Cultrara spent the prior 23 years working as a Dental Hygienist for two leading dental practices in Upper Montclair, New Jersey. She, too, is a graduate of Middlesex College where she received an AAS degree in Dental Hygiene.

### **About Milestone Scientific Inc.**

Headquartered in Livingston, New Jersey, Milestone Scientific is engaged in pioneering proprietary, highly innovative technological solutions for the medical and dental markets. Central to the Company’s IP platform and product development strategy is its patented *CompuFlo*<sup>®</sup> technology for the improved and painless delivery of local anesthetic. Specifically, *CompuFlo* is a computer-controlled, pressure sensitive infusion, perfusion, suffusion and aspiration technology, which provides real-time readouts of pressures, fluid densities and flow rates, enabling the advanced delivery and removal of a wide array of fluids. The *STA*<sup>™</sup> (Single Tooth Anesthesia) System, a computer-controlled local anesthesia delivery system, uses this technology to provide dentists with audible and visual signals as to in-tissue pressure. Milestone’s existing painless injection systems are currently sold in 25 countries. For more information on these and other innovative Milestone products, please visit the Company’s web site found at [www.milesci.com](http://www.milesci.com) and [www.STAis4U.com](http://www.STAis4U.com).

### ***Safe Harbor Statement***

*This press release may contain forward-looking statements regarding the timing and financial impact of the Milestone's ability to implement its business plan, expected revenues and future success. These statements involve a number of risks and uncertainties and are based on assumptions involving judgments with respect to future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond Milestone's control. Some of the important factors that could cause actual results to differ materially from those indicated by the forward-looking statements are general economic conditions, failure to achieve expected revenue growth, changes in our operating expenses, adverse patent rulings, FDA or legal developments, competitive pressures, changes in customer and market requirements and standards, and the risk factors detailed from time to time in Milestone's periodic filings with the Securities and Exchange Commission, including without limitation, Milestone's Annual Report on Form 10-KSB for the year ended December 31, 2007. The forward looking-statements in this press release are based upon management's reasonable belief as of the date hereof. Milestone undertakes no obligation to revise or update publicly any forward-looking statements for any reason.*
